

2026 Q2 Newsletter

Pump Up Your Savings on Heat Pumps

Get **increased incentives of \$750 per ton** when you install qualifying commercial and industrial, and municipal air source heat pumps.

It's a limited-time offer, so don't wait to apply.

Apply by July 31, 2026, and complete installation by Nov. 30, 2026, to earn the higher incentive. After that, incentives return to \$250 per ton.

Upper Valley Businesses Get No-Cost Earth Day Energy Assessments

More than 30 local businesses turned out for our Main Street Energy Efficiency event for Earth Day, making it a huge success. We teamed with Alliance Mechanical, Defiance Electric and Energy Management Consultants, Inc. to identify upgrades for business owners, from LED lighting and controls to insulation and air sealing. The upgrades will be installed within the coming weeks, helping these businesses improve efficiency and reduce operating costs.

Business owners in the entire area can still participate in a no-cost energy assessment by calling 603 637 4346, emailing NHSaves@FranklinEnergy.com or visiting www.franklinenergynhsaves.com. Liberty remains committed to supporting a strong, sustainable business community and helping businesses save energy and money all year long.

Welcome to the Team!

Say hello to Jon Dutka, our newest team member. He serves as a contact for Liberty electric businesses and municipalities in the Connecticut River Valley, Upper Valley, and southern New Hampshire regions. You can reach him at jdutka@franklinenergy.com or 603-246-5130.

Want to learn more?

Take advantage of Liberty's Commercial, Industrial and Municipal Energy Efficiency Program.
