3,204 Lifetime net MWh Savings

Callahan Construction

3,064 Lifetime net MWh Savings

Your Final Lighting Application Checklist

Let's shed some light on the application process! Whenever you're preparing to submit customers' final lighting applications, run through the following checklist. The best way to prevent application processing delays is to make sure all required information is submitted.

- A signed [rebate application](#), which can be found on the NHSaves website.
- A copy of the payee's W9.
- A copy of the final invoice, including material and labor.
- Photos of the entire installed unit, as well as a photo of the installed unit's nameplate with the model number. A Franklin Energy representative is also available for a post inspection to take the required photos.
