

Why Heat Pumps are a Smart Investment

Did you know that up to 40%¹ of the energy used by an average business is attributed to heating and cooling? Did you also know that heat pumps heat and cool and can be as much as 300%² more efficient than traditional heating and cooling systems?

By upgrading to a heat pump, you can:

- Lower your business' energy costs significantly.
- Eliminate the need for a traditional A/C unit, which can lead to lower energy costs year-round.
- Receive enough on-bill savings to pay for the heat pump (and then some) over its lifetime.

Download our heat pump sell sheet to learn more.

0% Interest, On-Bill Financing

Did you know that Liberty offers 0% interest, on-bill financing to help customers pay for qualifying energy-efficient projects (after incentives)? This is an excellent way for your customers to move ahead with projects with zero to minimal upfront costs. If you are interested in learning more about how on-bill financing works and how to use it as a sales tool, please complete this quick survey. (If there is enough interest, we will offer an online training.)

Claim Incentives on Projects You've Already Completed

If you or your customer has made energy-saving improvements to your facility since November 2023 (or plan to this year), you may be eligible for financial incentives like these:

- **Chillers** - Up to \$20 per ton
- **Air Compressor** - Up to \$200 per HP
- **Kitchen Equipment** - Up to \$3,000 of cost
- **Lighting and Controls** - Up to 50% of cost
- **Refrigeration** - Up to 50% of cost
- **Water Heater** - Up to \$2,000 per unit

For a full list of incentives, rebates, and equipment qualifications, visit the NHSaves® website.

Upcoming Events:

Compressed Air Fundamentals Training

Tuesday, September 17, 2024
8 a.m. – 4 p.m.

Eversource, 780 N. Commercial Street,
Manchester, NH 03101

[Register](#)

This training is ideal for contractors, facility engineers, building operators and maintenance staff, focusing on a systems approach to optimizing their compressed air usage.

The NHSaves® utility partners invite you to attend this one-day introductory course. Learn how to achieve 15-25 percent cost savings through more efficient production and use of compressed air.

Commercial Codes Training

Thursday, September 19, 2024
8 a.m. – 1 p.m.

Eversource, 780 N. Commercial Street,
Manchester, NH 03101

[Register](#)

Perfect for building code officials, commercial facilities staff, architects, engineers, and others involved in commercial construction, this in-person session will help you:

- Understand how to apply, comply, and interpret commercial energy codes in new construction, major renovations, and existing buildings.
- Learn allowable compliance paths.
- Recognize information required on construction documents.
- Appreciate the various topic areas addressed in the IECC and know where to look for more detailed requirements.

A light breakfast and box lunch will be served.
